

EPCLUSA EDUCATION LINE

MANY RESOURCES. ONE NUMBER TO CALL.

Whether you're just starting to think about your hepatitis C (Hep C) or have questions at any point during your EPCLUSA treatment, you'll find the support you need with the EPCLUSA Education Line.

Talk with an EPCLUSA Educator:

1-844-4-EPCLUSA (1-844-437-2587)

EPCLUSA EDUCATORS

EPCLUSA Educators provide information and resources, and can connect you with additional support.

TOOLS & RESOURCES

These include a personalized list of Hep C Specialists near you, a helpful guide with key points to discuss with your Specialist, and more.

NURSE SUPPORT

Nurses are available for clinical questions about your Hep C and treatment.*

PERSONALIZED FOLLOW-UP PROGRAM

This opt-in program provides customized reminders and support to meet your needs.

*Nurse support does not take the place of conversations with your Hep C Specialist.

If EPCLUSA is a treatment option for you, your call can be transferred to Support Path[®] to discuss insurance and financial support.

- **INSURANCE INFORMATION AND COVERAGE OPTIONS**
- **CO-PAY COUPON PROGRAM FOR ELIGIBLE PATIENTS**
- **ASSISTANCE FOR THE UNINSURED AND UNDERINSURED**

IMPORTANT FACTS

This is only a brief summary of important information about EPCLUSA and does not replace talking to your healthcare provider about your condition and your treatment.

ABOUT EPCLUSA

EPCLUSA is prescription medicine used to treat adults with chronic (lasting a long time) hepatitis C virus (HCV) genotype 1-6 infection with or without cirrhosis (compensated).

MOST IMPORTANT INFORMATION ABOUT EPCLUSA

EPCLUSA can cause serious side effects, including:

Hepatitis B virus reactivation: Before starting treatment with EPCLUSA, your healthcare provider will do blood tests to check for hepatitis B infection. If you have ever had hepatitis B, the hepatitis B virus could become active again during or after treatment with EPCLUSA. This may cause serious liver problems including liver failure and death. Your healthcare provider will monitor you if you are at risk for hepatitis B reactivation during and after you stop taking EPCLUSA.

Please see full Important Facts about EPCLUSA including **Important Warning on hepatitis B reactivation** on page 2.

Hepatitis B virus reactivation: Before starting treatment with EPCLUSA, your healthcare provider will do blood tests to check for hepatitis B infection. If you have ever had hepatitis B, the hepatitis B virus could become active again during or after treatment with EPCLUSA. This may cause serious liver problems including liver failure and death. Your healthcare provider will monitor you if you are at risk for hepatitis B reactivation during and after you stop taking EPCLUSA.

ABOUT EPCLUSA

EPCLUSA is a prescription medicine used to treat adults and children 6 years of age and older or weighing at least 37 lbs (17 kg) with chronic (lasting a long time) hepatitis C virus (HCV) genotype 1, 2, 3, 4, 5, or 6 infection with or without cirrhosis (compensated). In those with advanced cirrhosis (decompensated), EPCLUSA is used with ribavirin.

POSSIBLE SIDE EFFECTS OF EPCLUSA

EPCLUSA can cause serious side effects, including:

- Those in the “Most Important Information about EPCLUSA” section.
- **Slow heart rate (bradycardia):** EPCLUSA, when taken with amiodarone (Cordarone[®], Nexterone[®], Pacerone[®]), a medicine used to treat certain heart problems, may cause slow heart rate, which in some cases has led to death or the need for pacemaker when amiodarone is taken with medicines containing sofosbuvir. Get medical help right away if you take amiodarone with EPCLUSA and get any of the following symptoms:

• fainting or near-fainting	• weakness	• chest pains
• dizziness or lightheadedness	• extreme tiredness	• confusion
• not feeling well	• shortness of breath	• memory problems

The most common side effects of EPCLUSA include headache and tiredness. Tell your healthcare provider if you have any other side effect that bothers you or that does not go away.

These are not all the possible side effects of EPCLUSA. For more information, ask your healthcare provider or pharmacist. You may report side effects to FDA at 1-800-FDA-1088.

BEFORE TAKING EPCLUSA

Tell your healthcare provider about all of your medical conditions, including if you:

- have ever had hepatitis B virus infection
- have liver problems other than hepatitis C infection
- have kidney problems or you are on dialysis
- have HIV-1 infection
- are pregnant or breastfeeding, or plan to become pregnant or breastfeed
 - If you take EPCLUSA with ribavirin, you should also read the ribavirin Medication Guide for important pregnancy-related information.

Tell your healthcare provider about all the medicines you take:

- Keep a list that includes all prescription and over-the-counter medicines, vitamins, and herbal supplements, and show it to your healthcare provider.
- EPCLUSA and certain medicines may affect each other, or cause side effects.
